Our reputation resulted from the good feedback from the finished projects located in over the 35 countries. For example: The USA, Canada, Australia, Mauritius, Ghana ,Kenya, Thailand Caribbean Countries and European Countries etc.

CERTIFICATE

CHINA ENVIRONMENTAL LABELING

The Ten-ring Mark indicates that a product not only meets quality standards but also complies with specific environmental protection requirements throughout its production, usage, and disposal. Compared to similar products, it offers environmental advantages such as lower toxicity, reduced harm, and resource conservation.

ISO 9001 CERTIFICATION

Obtaining Environmental Management System (EMS) certification demonstrates that a factory's raw materials, production processes, manufacturing methods, as well as product usage and end-of-life disposal, comply with environmental protection standards and regulations.

WARNOCK HERSEY MARK

The WH Mark is North America's leading safety and performance certification for building and construction products. Products bearing the WH Mark demonstrate compliance with relevant building codes, association standards, and product safety and performance standards. Nearly 80% of wood fire doors in North America carry the WH Mark.

FSC CERTIFICATION

FSC certification, also known as timber certification, is a market-based tool designed to promote responsible forest management, achieving ecological, social, and economic objectives. FSC forest certification encompasses both Forest Management (FM) certification and Chain of Custody (CoC) certification.

FIRE DOOR CERTIFICATION

Wood fire doors are specialized doors constructed using fire-retardant timber or wood products for the frame, structure, and facings. Their cores are filled with fire-resistant insulating materials, and they incorporate certified fire-rated hardware. These doors comply with the Chinese national standard GB 50045-95 "Code for Fire Protection Design of Tall Buildings.

EN 13986 TESTING AND CE MARKING

EN 13986 testing and CE Marking assist wood door manufacturers in accessing the European market. Additionally, adopting this standardized process helps optimize internal management and achieve sustainable development. Wood doors covered by EN 13986 testing include interior and exterior wood doors (solid wood doors, composite wood doors, fire-rated wood doors, etc.).

ENTRANCE DOOR

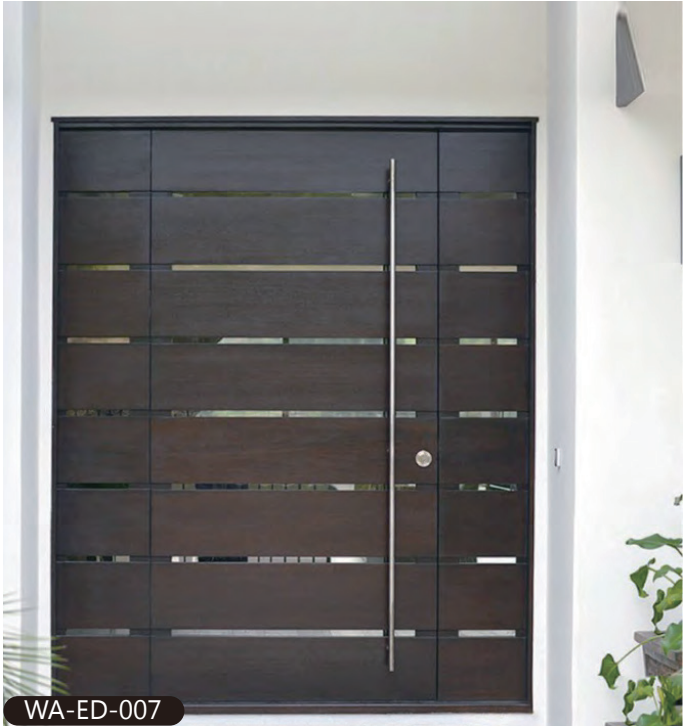

Crafted as functional art, our designer entrance doors merge sculptural forms with fortress-like security. Each piece features hand-finished details, anti-burglar reinforced cores, and proprietary coatings that defy extreme climates while blocking UV degradation.

The result? Timeless elegance that withstands decades of elements—transforming thresholds into breathtaking statements of sanctuary and style.
