Company Profile

Company since its establishment, has been committed to providing customers with innovative and efficient sunshade solutions to enhance the comfort and quality of outdoor living. Our vision is to become a leader in the outdoor sunshade industry, offering the best sunshade products and services to global consumers.

Our product covers various types of outdoor sunshade equipment, including electric flip pavilions, smart windproof roller blinds, folding awnings, and Chinese-style pavilions. We prioritize product quality and design, utilizing advanced materials and craftsmanship to ensure excellent durability, stability, and sunshade performance. Additionally, we offer customization services to meet the diverse needs customers.

We have a professional R&D team that continuously launches innovative products and technologies to meet the ever-changing market and consumer demands. We also provide comprehensive support and maintenance to ensure customer satisfaction and safety during the usage process.

As a socially responsible enterprise, we actively participate in social welfare activities, promoting environmental protection and sustainable development. We use environmentally friendly materials and processes to reduce negative impact on the environment. Meanwhile, we advocate the concept of energy conservation, emission reduction, and green living, making contributions to the society.

Company is committed to providing global consumers with the best outdoor sunshade experience through excellent products, professional services, and innovative spirit. We look forward to working with you to create a better future!

Customize your exclusive private outdoor space

Every detail reflects the love and pursuit of life
In this small space you can find moments of peace and tranquility for your soul
Discover the beauty of nature and enjoy the serenity of life
Customize your outdoor space and create a unique natural paradise

147 TYPE

LIGHT-WEIGHT LOUVER PERGOLA

Outdoor leisure space

147 model is simple and lightweight, made of high-quality aluminum alloy, high-density powder spraying, rust prevention, corrosion protection, strong and durable;

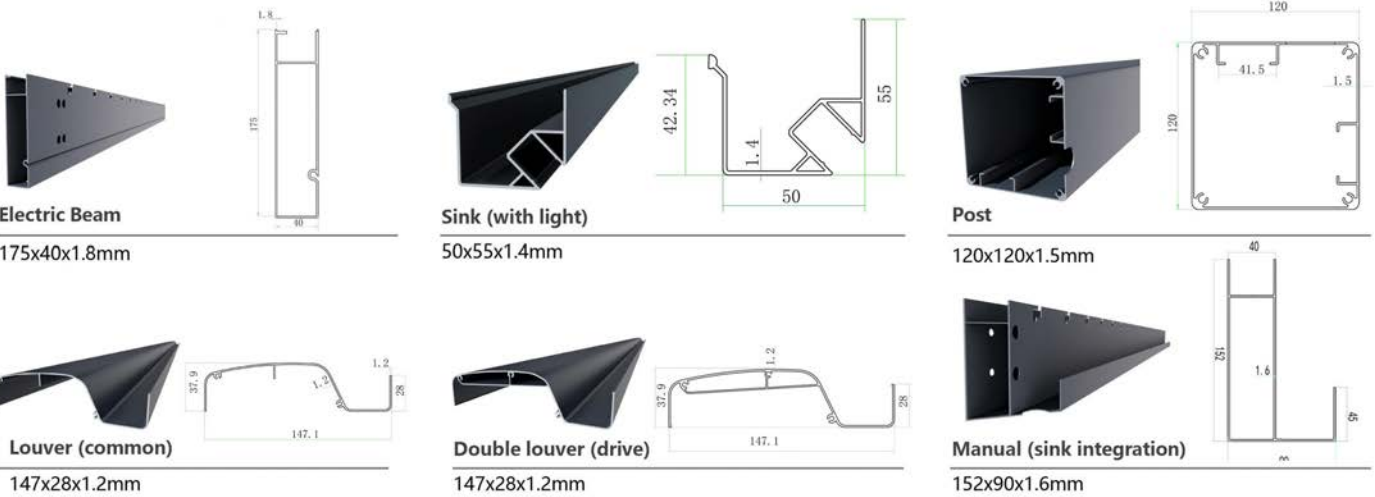

There are electric and manual models to choose from, and you can choose whether to have a lighting system;

Type 147 only produces standard size orders, suitable for large volume wholesale, foreign trade export customers to quickly open up the market.

Basic parameter

Name: 147-pergola	Drive: Manual/Electric	Windproof: Force 10 gale (completely closed)
Material: 6063Aluminium alloy	Size: 2.5x3/3x3/3x3.6/3x4/4x4/3x6	Default height: 2.5m
Rainproof: 100%	Width: Louver max length 3 meters, over 3 meters can be double-layer blades	Surface: Powder spraying
		Color: grey7043/white9016

Prople parameter

Product Advantage

6063

Aluminum Alloy

Made of all aluminum alloy material, with high strength, light weight, no rust, and longer service life.

Reliable hand cranking device

The hand cranked device is labor-saving, low-cost, and does not have the problem of complex code debugging or malfunction of electronic components.

High density powder spraying

The surface is coated with a mixture of polycrystalline diamond composite, plastic, and resin, which is rust free, environmentally friendly, formaldehyde free, acid and alkali resistant, and will not fade for 20 years.

Two-color light strip

147 pergola with 45° inclined, cold and warm two-color light belt, one key to switch the cold and warm color, but also adjust the brightness size, more convenient.

Flip Panel Pavilion

Aluminum alloy construction

Aluminum is lightweight, resistant to corrosion and rust, easy to clean and maintain, and has a long service life.

Simple in structure

The flip design allows for adjustable sunshade angles, providing high flexibility to adapt to different lighting conditions and offering a comfortable sunshade effect.

Sleek in appearance

Modern style design, with a simple and elegant appearance, aesthetically pleasing and fashionable. It can seamlessly blend with various outdoor environments, enhancing the landscape effect.

Rich in functionality

Provides sun protection, rain shelter, wind resistance, and other functionalities, making it suitable for outdoor relaxation, gatherings, yoga practice, etc., catering to people's diverse needs.

Convenient installation

It is easy to install and does not require complex construction technology. We can choose different sizes and styles according to actual needs.

Applicable places

Outdoor spaces such as courtyards, gardens, parks, and leisure squares, providing people with comfortable resting and activity spaces.

Fire-resistant

6 Aluminum Alloy Flip Panel Pavilion ADVANTAGE

Outdoor
Space Customization

Wide opening angle

01

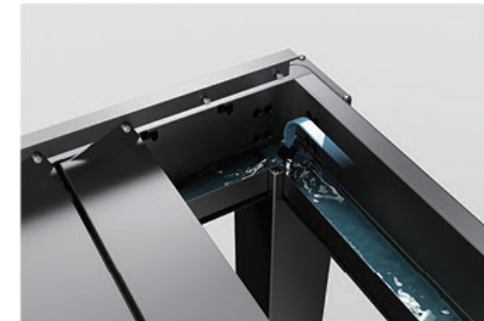

The opening and closing angle of the blade reaches 100 °. You can adjust the shading degree and air intake according to needs.

Dual-groove waterproofing for louver

02

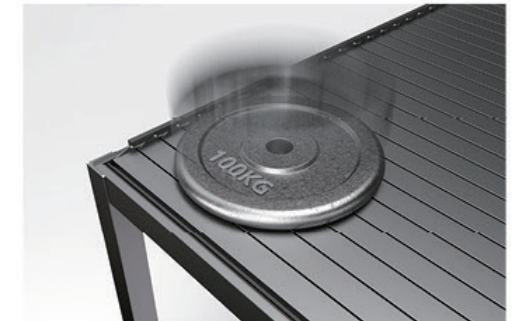

The louver is equipped with a side drainage system, which can be opened even after heavy rain. Rainwater will flow into the sink from the blades and will not cause dripping.

Invisible drainage

03

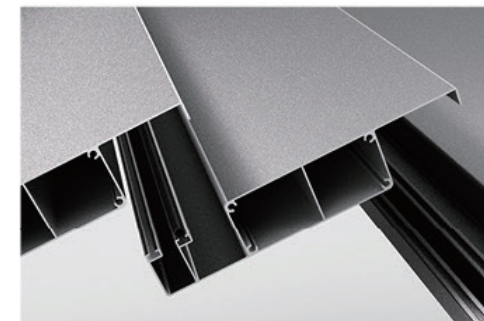

The invisible drainage system can allow rainwater to be directly discharged from the top surface of the louvers into the columns. Then it is discharged through underground drainage channels.

Carrying capacity of 100 kilograms

04

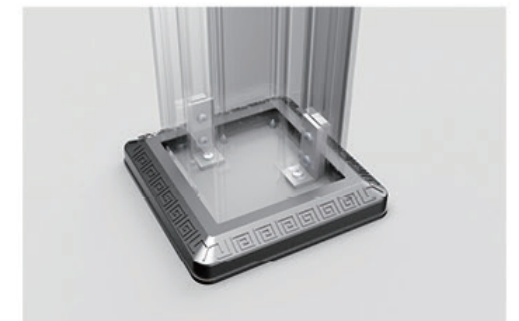

The columns and beams are larger and thicker, the blades are wider and thicker, and the real materials are more stable and durable, with a resistance to snow pressure of up to 100kg/square meter.

Aluminum alloy & powder coating

05

Made of high-quality aluminum alloy, it integrates strong wind pressure resistance, corrosion resistance, and deformation resistance; High density powder coating on the surface, non fading for 20 years.

Column base plate L-type support reinforce

06

The L-type support bottom plate can prevent negative effects such as looseness, rust, or corrosion, improving connection strength, and enhancing the stability and safety of the structure.

Electric Folding Awning

Multifunctionality

In addition to the basic functions of sunshade and rain proofness, it can also have additional features such as intelligent lighting and enhance the user experience.

Energy-saving and environmentally friendly

By applying energy-saving materials and intelligent control systems, it can effectively save energy and adhere to the concept of energy conservation and environmental protection.

Excellent durability

Made with durable materials, which has a long service life and is not easily affected by external environmental factors.

Security and reliability

With safety protection functions, such as wind and rain sensors that can sense bad weather, it can automatically put away to ensure safety of user.

Fashion in design

The appearance design is stylish, which can be integrated with the architectural style to enhance the overall aesthetic feeling

Flexible installation

With flexible installation methods, the product can be suitable for various outdoor spaces to meet different needs.

Aluminum alloy construction

Rainproof and sunshade

Intelligent remote control

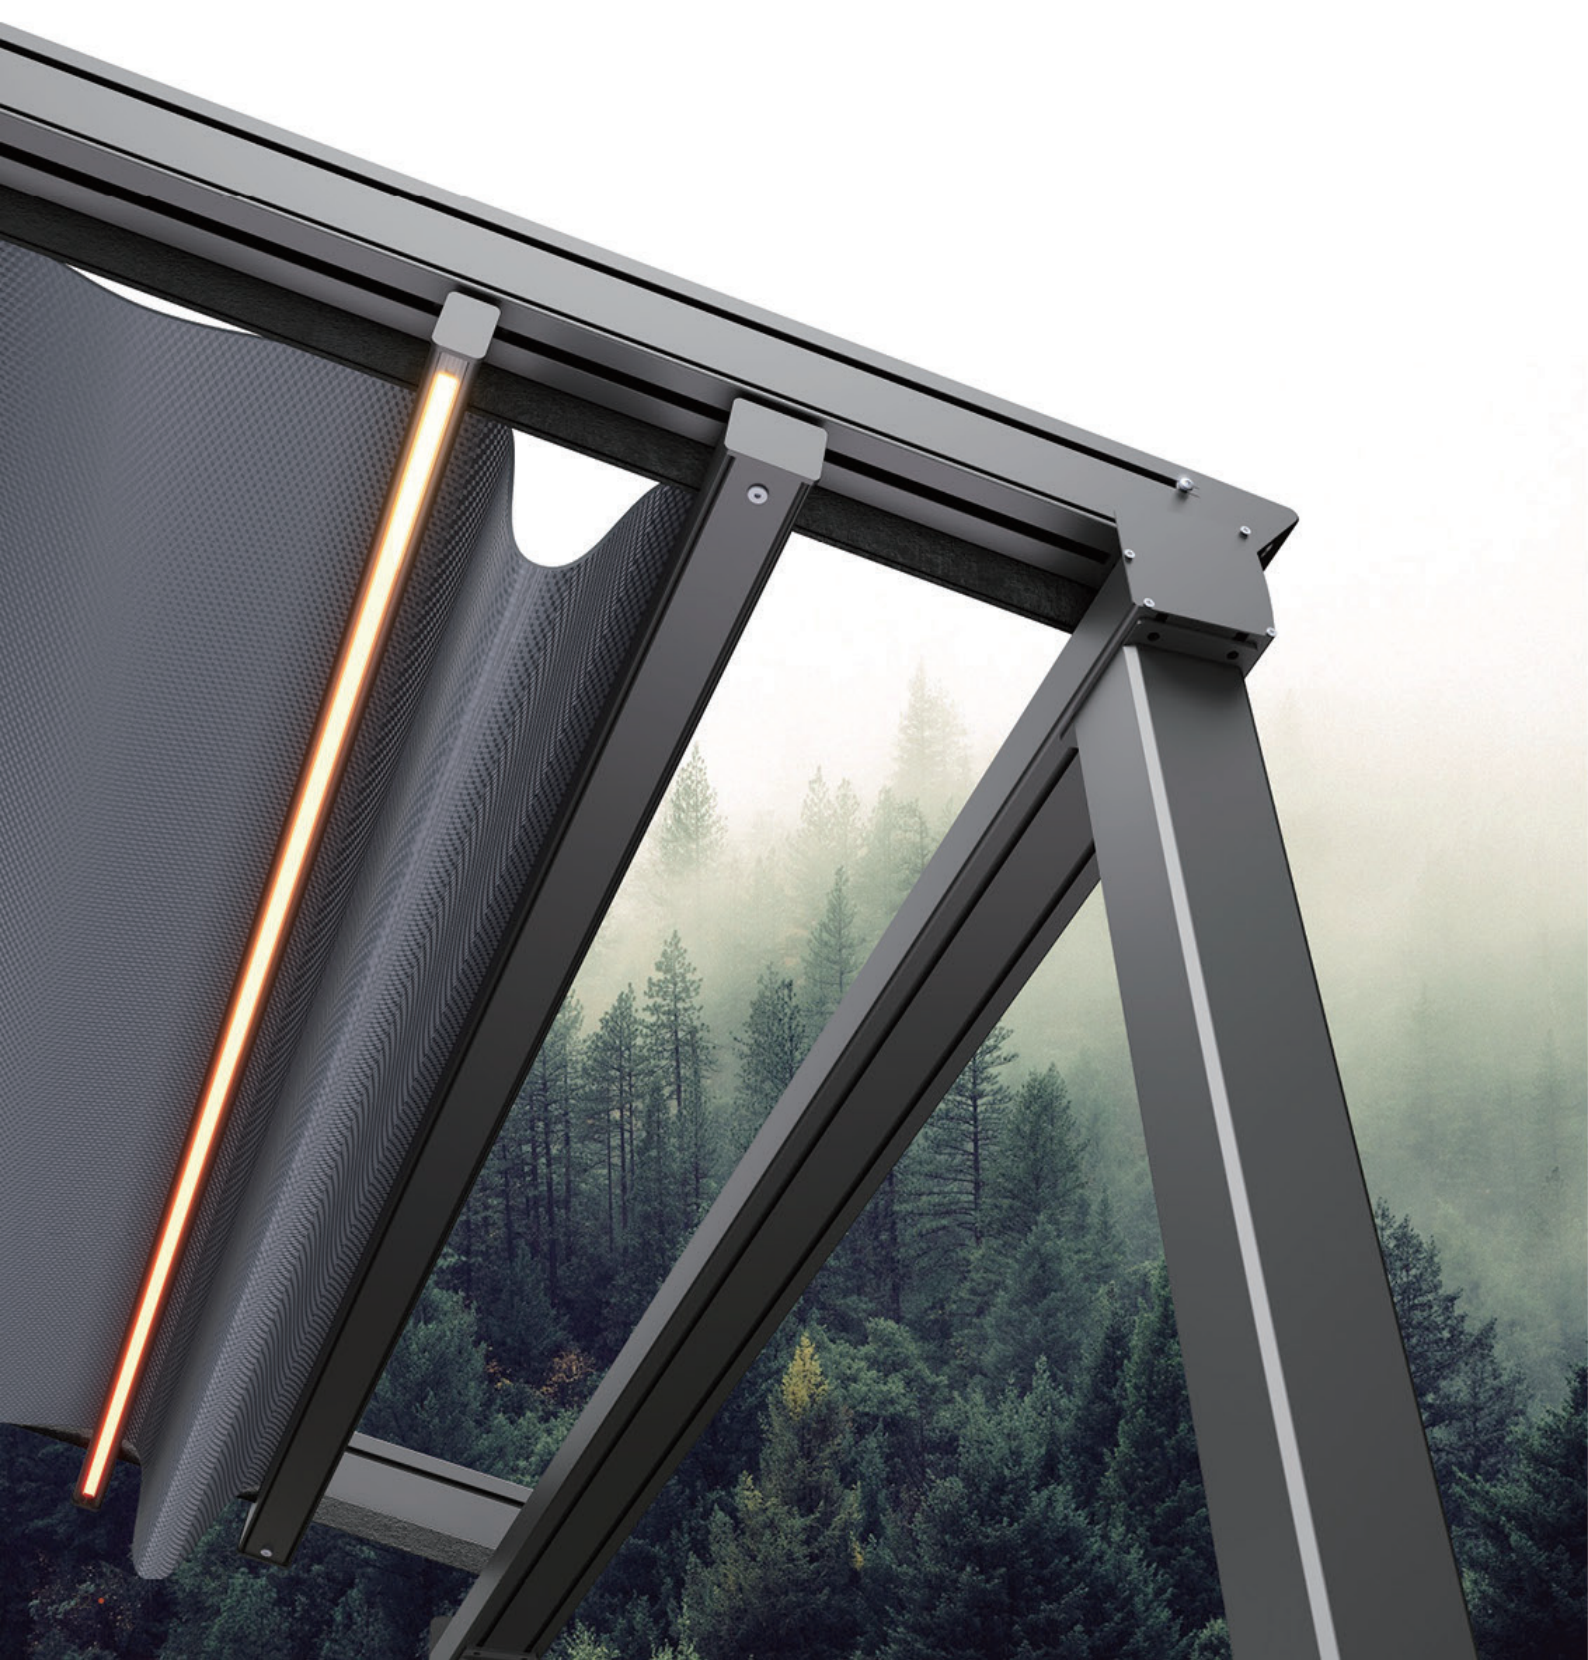

Motor driven

Built-in light strip

6 Electric Folding Awning ADVANTAGE

Thickened profiles

01

The incorporation of reinforced profiles in the design ensures the stability and durability of the product.

Wireless remote control

02

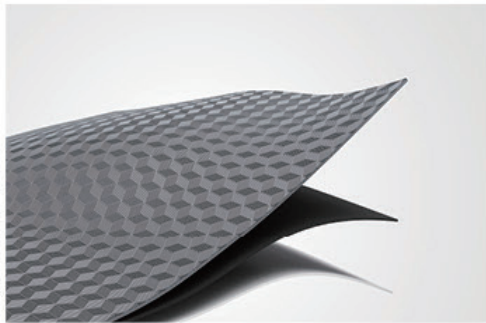

Effortlessly operate the opening and closing of the screen by remote control, facilitating a seamless experience.

Shading and heat insulation

03

With outstanding sun-shielding and heat-insulating capabilities, it effectively blocks intense sunlight and heat, creating a comfortable and cool environment for users.

3D curtain

04

Crafted from outdoor-specific 3D fabric, boasting excellent waterproof properties and enhanced stain resistance. The special color-locking technique ensures vibrant and long-lasting colors that resist fading.

Water conduction design

05

The gutter features a G-shaped design structure to guide rainwater flow smoothly without causing splashing as it travels down the gutter.

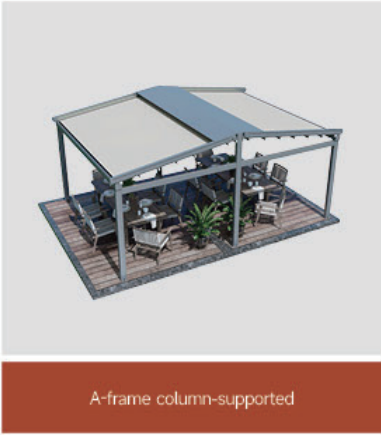

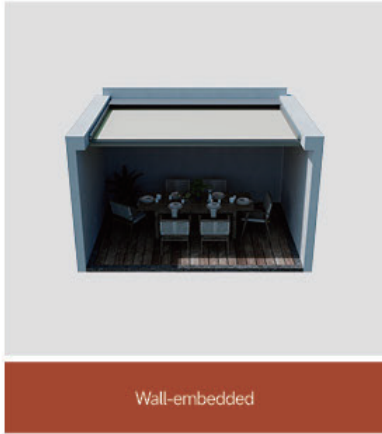

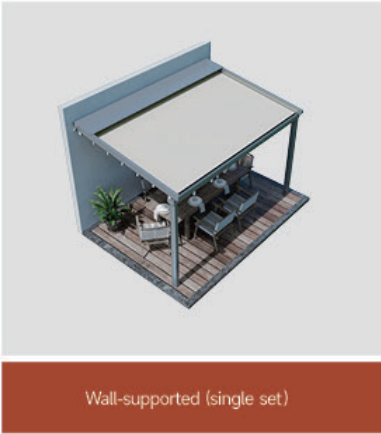

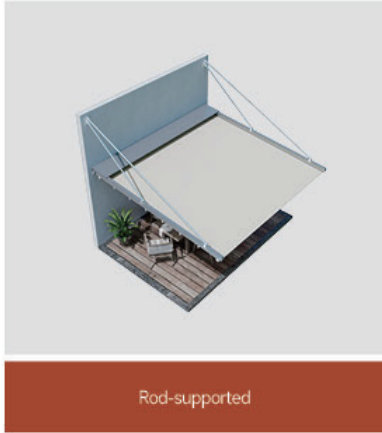

Waterproof and rainproof

06

With outstanding rain and water resistance, the product effectively prevents rainwater seepage by utilizing high-quality waterproof materials and precision craftsmanship.

Electric Windproof Roller Shutter

Strong wind protection

The windproof roller shutter adopts strong material and structural design, has strong wind resistance, and can effectively resist strong winds.

Shading effect

It can be used as a sunshade device to reduce indoor temperature, reduce ultraviolet radiation, provide comfortable indoor temperature, and reduce air conditioning energy consumption.

User-friendly

The shutter switch is easy to operate, can be manually or electrically controlled, easy to use, and does not need to take up additional space.

Security and reliability

With safety protection functions, such as wind and rain sensors can sense bad weather, it can automatically put away to ensure safety.

Attractive appearance

The roller shutter can be designed in various colors and styles, which can be customized according to customer needs, and the surface gloss is high, promoting the overall harmony of the building.

Privacy protection

It can provide privacy protection to prevent passersby or neighbors from peeking inside the building, making the living or working environment more private.

Strong wind protection

Sun block

Waterproof

Anti-insect

Privacy protection

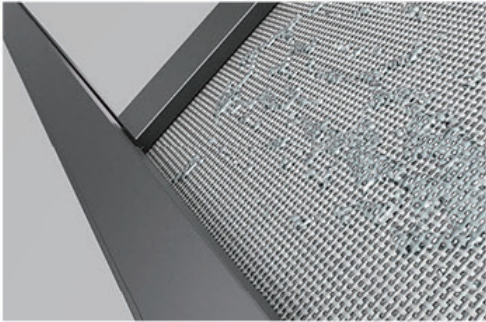

6 Electric Windproof Roller Shutter ADVANTAGE

Electric remote control 01

It can be remotely controlled via a remote controller or a mobile app, making it easy to open and close the roller shutter with ease.

Waterproof 02

By using waterproof materials and special designs, the roller shutter can effectively block the penetration of rainwater.

Sunshade and a panoramic view 03

Outstanding sunshade and transparent view function, effectively blocking sunlight while maintaining good lighting effects.

Strong wind protection 04

It can maintain stability in strong wind conditions, being less susceptible to deformation or damage from wind forces.

Ultraviolet-proof 05

It can effectively block the penetration of ultraviolet rays. Not only does it protect indoor furniture and items from UV damage, but it also helps reduce the rise in indoor temperature.

Anti-mosquito and anti-insect 06

It can effectively isolate the indoor and outdoor environment, avoiding the intrusion of mosquitoes and other pests, whether it is on an outdoor terrace or indoor living space.

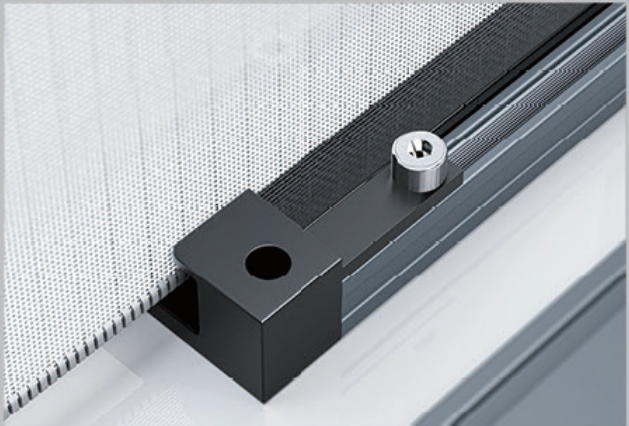

Upgraded Inner Track

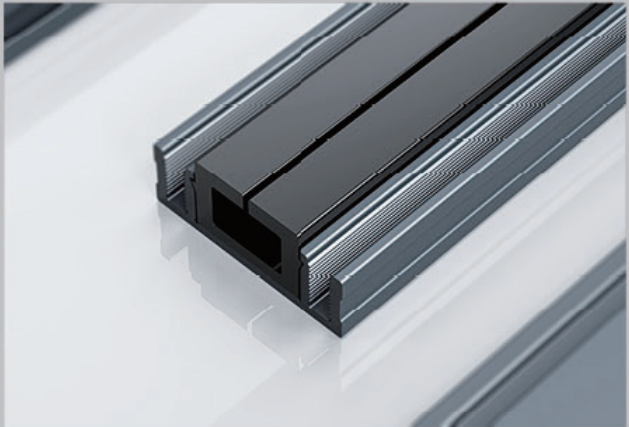

110/130 **Electric Windproof** **Roller Shutter**

With newly upgraded stainless steel shrapnel, fabric in the stable elastic support ensures the flatness of the fabric, having a long service life.

The new upgraded zipper guider allows the zipper to enter the plastic track smoothly and prevent the zipper from derailing.

The aluminum track is installed outside the plastic track to ensure that the plastic track does not bend in the length direction and does not distort in the width direction to further prevent the zipper from derailing.

Grape arbor pavilion

Design & Aesthetics

Our grapevine pergolas are crafted with sleek, modern lines and natural wood finishes, adding timeless charm to any outdoor space. The intricate lattice design allows vines to weave beautifully, creating a lush, shaded retreat.

Durability & Materials

Built from premium, weather-resistant materials like cedar, redwood, or powder-coated aluminum, our pergolas withstand harsh elements while maintaining structural integrity for years.

Customization Options

Choose from various sizes, colors, and roof styles (solid, retractable, or open lattice) to match your landscape. Personalize with climbing plants, lighting, or curtains for added ambiance.

Functionality & Comfort

Designed for relaxation, our pergolas provide shade and ventilation, making them ideal for outdoor dining, lounging, or garden decor. Optional add-ons like mosquito nets enhance comfort.

Easy Installation & Maintenance

Pre-assembled components and clear instructions ensure hassle-free setup. Low-maintenance materials require only occasional cleaning to preserve their beauty.

Versatility

Perfect for gardens, patios, poolsides, or commercial spaces, our pergolas transform any area into a serene, stylish retreat.

Anti-insect

Good ventilation

100%

6 Grape arbor pavilion ADVANTAGE

The color variety is rich 01

It not only possesses the natural wood texture and grain, but also allows customization of colors according to personal preferences.

No maintenance required 02

No need for repairs or upkeep, easy to clean, saving on future repair and maintenance costs.

has a long lifespan 03

The lifespan of an aluminum alloy grape arbor is 3 to 4 times that of treated wood.

Installation is simple 04

No complex construction processes are required, saving installation time and costs.

Good workability 05

Can be ordered, planed, sawed, bent, straightened, rounded, squared, and used to make various wooden products, but cannot be used to create complex shapes.

High moldability 06

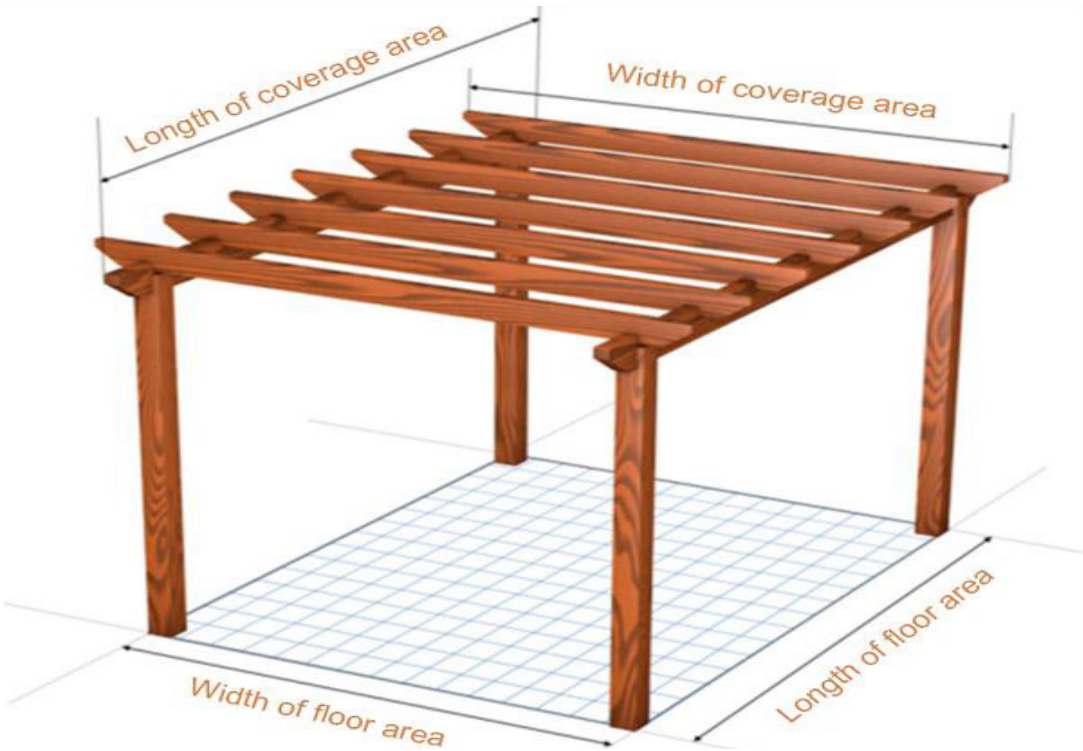

It can achieve personalized styling very easily, fully reflecting individual style.
